CIHR
IRSC

Canadian Institutes of
Health Research
Instituts de recherche
en santé du Canada

We are grateful to the many partners and stakeholders who completed the survey on the **future priorities for patient-oriented research**.

We have received over 300 responses from coast to coast to coast from various perspectives, including patients, researchers, and decision makers. This is a testament to the community's interest and commitment to patient-oriented research. In the first stage of the online discussion, we asked you to complete a short survey about recommended research priorities.

In the next stage, we invite you to share your ideas on the common themes we heard in the survey on the [CIHR Let's Talk website](#):

- **Ideas section:** please vote on the theme(s) you recommend that SPOR should prioritize over the next five years.
- **Forum section:** please help us understand each of these themes by expanding on the descriptions.

We also invite you to interact with other respondents by asking questions and/or providing comments.

We encourage you to participate and share this link within your community. This stage of the online discussion is open until **October 29, 2021**.

As in the first stage, we welcome responses by phone, e-mail, or mail if you are unable to participate in the online consultation.

Please call us toll free at 1-888-603-4178 (press 1) or email us at SPORConsultationSRAP@cihr-irsc.gc.ca and we will ensure your voice is heard.

Thank you for taking the time to share your ideas. Your voice will help inform future areas of focus in patient-oriented research and contribute to the achievement of the [CIHR Strategic Plan 2021-2031](#). A "What We Heard" report summarizing the results will be shared with the community in 2022, and we look forward to working with partners and stakeholders in patient-oriented research to implement the resulting priorities.

Nous sommes reconnaissants envers les nombreux partenaires et intervenants qui ont répondu au sondage sur les **priorités futures en matière de recherche axée sur le patient**.

Nous avons reçu plus de 300 réponses des quatre coins du Canada de divers points de vue, y compris des patients, des chercheurs et des décideurs. Cela témoigne de l'intérêt et de l'engagement de la communauté envers la recherche axée sur le patient. Dans la première étape de la discussion en ligne, nous vous avons demandé de répondre à un court sondage sur les priorités de recherche recommandées. Dans la prochaine étape, nous vous invitons à partager vos idées sur les thèmes communs dont il a été question pendant le sondage sur le [site Web du Forum IRSC](#) :

- **Section « Idées » :** Veuillez voter pour le ou les thèmes que, selon vous, la Stratégie de recherche axée sur le patient devrait privilégier au cours des cinq prochaines années.
- **Section « Forum » :** Aidez-nous à comprendre chacun de ces thèmes en développant les descriptions.

Nous vous invitons aussi à interagir avec les autres répondants en posant des questions et en faisant des commentaires. Nous vous encourageons à participer et à diffuser cet hyperlien au sein de votre communauté. Cette étape de la discussion en ligne se déroule jusqu'au **29 octobre 2021**.

Comme dans la première étape, nous acceptons aussi les réponses par téléphone, par courriel ou par la poste si vous ne pouvez pas participer à la consultation en ligne. Veuillez nous appeler sans frais au 1-888-603-4178 (faites le 1) ou nous écrire à SPORConsultationSRAP@cihrirsc.gc.ca, et nous nous assurerons que votre voix sera entendue.

Merci de prendre le temps de nous faire part de vos idées. Elles aideront à déterminer les futurs domaines d'intérêt de la recherche axée sur le patient et contribueront à la réalisation du [Plan stratégique des IRSC 2021-2031](#). Un rapport de type « Ce que nous avons entendu » résumant les résultats sera transmis à la communauté en 2022, et nous sommes impatients de collaborer avec les partenaires et intervenants de la recherche axée sur le patient pour mettre en oeuvre les priorités qui en découleront.
